PREFACE TO VOLUME VII

THIS volume contains the words beginning with the letters O and P. Including the Main words, to which separate articles are allotted, the special Combinations or compounds, explained and illustrated under the Main words, and the Subordinate entries of obsolete and variant forms entered in their alphabetical places, with a reference to the Main words under which they are treated and illustrated, the number of words amounts to 41,667. The Combinations of simple and obvious meaning, of which lists are given under the Main words, without separate explanation, but in most cases with illustrative quotations, number 7,203, raising the actual total of words and compounds recorded in the volume to 48,870.

These words are thus distributed among the letters:

	Main words	Subordinate words.	Special Combinations.	Obvious Combinations.	Total No. of Words.	No. of Quotations.
O (356 pages)	7,118	1,198	692	2,173	11,181	38,615
P Pf (404 ")	7,208	1,811	1,281	1,470	11,770	41,880
Ph–Py (896 ")	15,974	3,384	3,001	3,560	25,919	94,575
Total	30,300	6,393	4,974	7,203	48,870	175,130

Considered as to their status in the language, the Main words are distinguished approximately into those which are native or fully naturalized, and still *current*, those now *obsolete* (marked †), and those considered to be *alien* or imperfectly naturalized (marked ‖), although in the case of both the latter it is often difficult to draw the line. The distribution of the 30,300 Main words is approximately as follows:

	Current.	Obsolete.	Alien	Total.
O	5,347	1,526	265	7,118
P–Pf	5,471	1,201	536	7,208
Ph–Py	12,302	2,628	1,044	15,974
Total[1]	23,120	5,335	1,845	30,300

Etymologically considered, the O section and the P section of the English vocabulary differ greatly in the proportions of their elements. O is in this respect an ordinary letter, containing a good proportion of words of Anglo-Saxon derivation, beside those of later adoption, from Scandinavian, Old French, Latin, and Greek, and more distant languages. Among the words that go back to Old English use are the prepositions *of* (to the lexicographer the longest and most difficult of English prepositions, the treatment of which in this Dictionary occupies 18 columns), *off*, *on*, *over*, the adverbs *off*, *oft*, *often*, *out*, the conjunction *or*, the numeral and pronoun *one* with its derivatives *once*, *only*, etc., the pronominal words *other*, *our*, *own*, the verbs *ought*, *owe*, *own*: all of great interest to the student of the historical grammar of the language. There are also numerous well-known substantives, as *oak*, *oakum*, *oar*, *oat*, *oath*, *ooze*, *ordeal*, *oven*, *owl*, and important adjectives as *old* and *open*. To these must be added the words compounded with *out* (1,250, including 775 Main words), and *over* (2,173, including 1,413 Main words). The *out-* and *over*-compounds occupy more than a fourth of O. The words from Latin include the compounds in *ob-* and its phonetic variants, *oc-*, *of-*, *op-*, and important words such as *order* and its family. Among the words from Greek are the numerous compounds in *ortho-*, and the chemical terms related to *oxygen*.

In P, on the other hand, the words that go back to Old English are a very small company. Of the 23,000 Main words here dealt with, about 80 appear in the Anglo-Saxon Dictionary, of which, however,

[1] Adding these to the words in Volumes I–VI, we have for the portion of the alphabet from A to P the following figures:

Main words.	Current.	Obsolete.	Alien.	Subordinate words.	Special Combinations.	Obvious Combinations.	Total.
168,519	146,134	11,197	3,188	40,440	30,139	33,819	264,917

For the letters O and P, the comparative scale of this work and of certain other Dictionaries is shown by the following figures:

	Johnson.	Cassell's Encyclopædic.	'Century' Dict.	'Funk's Standard'	Here
Words recorded	4,485	19,873	25,585	27,097	48,870
Words illustrated by quotations	3,661	6,337	8,368	2,379	38,365
Number of illustrative quotations	12,111	9,642	20,340	3,243	175,130

The quotations in Richardson's Dictionary in O and P are 9,640.

50 were borrowings from Latin, leaving only about 30 really 'native', most of them found in other Germanic languages. Among the chief of these are *pan*, *path*, *penny*, *pith*, *play*, *plight*, *plough*, *pock*, *pool*, *pretty*, *prick*, *puff*, *pull*, *put*. Of these the two last scarcely appear in Old English, but have since become verbs of great importance; the article PUT is, after GO, the longest as yet in the Dictionary, and has proved one of the most difficult. From causes stated in the article on the letter P, this was the rarest initial consonant in Old English, occupying in Bosworth-Toller's Anglo-Saxon Dictionary only one-fifth of the space of O. But its constant accessions from other languages, and apparently its aptitude to form onomatopœic words, have made it in the modern dictionary next in compass to S and C, with which it forms a triad of gigantic letters, containing together considerably more than a fourth of all the words in the language. The accessions began with the 50 words from Latin already mentioned, some, like *pile*, *pit*, and *pound*, of West Germanic age, but most of them only pre-Conquest English, either ecclesiastical, as *pall*, *pope*, *priest*, *prime*, or names of foreign plants and animals, as *parsley*, *pear*, *pease*, *pepper*, *pea(cock)*. The accessions continued with the words from Old French, in origin mostly Latin, and subsequently with words formed directly from Latin (sometimes ultimately from Greek), and also, from the 16th century, in the terminology of philosophy and science, from Greek directly. From the 16th century, words began to crowd in from other European and more distant tongues, until now there are to be found in the P division of this volume representatives of more than 50 languages. To these have been added a considerable number of words of unknown origin, many no doubt onomatopœias of English or its dialects. The compass of the letter has been greatly enlarged by the words formed with the Latin prefixes *per-*, *post-*, *pre-*, *pro-* (with its OF. form *pur-*), and with the Greek prefixes *para-*, *peri-*, *pro-*, and the formatives *pan-*, *panto-*, *philo-*, *poly-*, *pseudo-*, *pyro-*, etc. The words in PH are an alien group, representing (with few exceptions) Greek words in Φ, for which Roman spelling substituted PH, and which thus come in between PE- and PI-, at once to swell the P vocabulary and to increase its Greek elements. Of the 23,000 Main Words in P, nearly 7,900—more than one-third of the whole,—are of Greek derivation, or are formed with a Greek prefix or first element. This is a proportion much larger than obtains in the language as a whole.

The material collected up to 1885 for O to OM- was arranged chronologically and in part sub-edited by Miss Margaret Haig, of Blairhill, Stirlingshire (now Mrs. Alexander Stuart). The section OO- to OPPROBRIUM was skilfully sub-edited by the late Rev. W. J. Löwenberg, of Starkies, Bury, 1887–96, who died in 1899, before seeing any part of O in type. The section OPPUGN to OW- was sub-edited 1895–6 by Mr. James Bartlett, of Cloverlea, Bramley, Guildford, who after more than 20 years' voluntary work at the Dictionary, during which he sub-edited also G, parts of M, R, and S, died on 15 August, 1908. The very technical section from OX to OZ- was arranged and sub-edited by Mr. H. A. Nesbitt, B.A. in 1895. For PA-, the material collected by the Philological Society had, in consequence of the death of the person who undertook its sub-editing, been nearly all lost or destroyed. It had in consequence to be collected anew, which was largely done by the late Mr. E. S. Jackson, M.A., Plymouth; as it accumulated, it was arranged, and finally sub-edited, 1882–7, by the late Miss J. E. A. Brown, of Cirencester. The slips for PE- to PELY- were sub-edited in 1884 by Mr. James Britton, F.L.S.; those for PEM- to PERP- by Mr. R. M'Lintock, of Liverpool, in 1885 and 1893–6; and those for PERS- to PIL- by Mr. W. J. Anderson, then of Markinch, who died in February, 1900. The large section PIM- to PROF- was laboriously sub-edited by Miss J. E. A. Brown, one of the most devoted and enthusiastic of our volunteer helpers, between 1900 and her sudden death on 19 February, 1907. Her work was ably continued, PROFIT to PRY, by the late Mr. C. B. Winchester, in 1907–8. The earlier material for PR- to PU- had been put in order by the late Mr. P. W. Jacob in 1885. The whole section PE- to PHY- was revised, with much new material, 1901–4, by our valued coadjutor the Rev. C. B. Mount, M.A., who also sub-edited, with much original research, the last section PS- to PYXIS in 1904–7. The generous and, in many cases, long-continued services of these voluntary collaborators, so few of whom, alas! survive, call for the fullest and most grateful recognition.

In the revision and improvement of the work in the proof stage, continuous and indefatigable help has been rendered by Misses E. P. and Edith Thompson, of Lansdown, Bath, whose investigations of the sense-history of difficult words have been most fruitful and valuable; also by the Rev. Canon Fowler, D.C.L., Durham, the Rev. J. B. Johnston, B.D., Falkirk, Mr. A. Caland, of Wageningen, Holland, Monsieur F. J. Amours, Glasgow, and in later parts by Professor F. E. Bumby, Nottingham. Assistance with the proofs has been only a small part of the gratuitous services rendered to the Dictionary by Mr. R. J. Whitwell, B.Litt. Oxon., who has contributed to the history of legal, historical, and other words by special investigations in the Bodleian and Codrington Libraries, the British Museum, and the Public Record Office. Many of our earlier illustrations for such words are the fruit of his researches. Five of our zealous helpers in this department have been removed by death during the preparation of this volume: the Right Hon. Lord Aldenham, who had sub-edited parts of C and K for the Philological Society, and had read our proofs from the beginning, died in September, 1907, Dr. W. Sykes, F.S.A., who supplied

most of our quotations for recent medical terms, died in September, 1906; Mr. E. L. Brandreth, who had sub-edited portions of H, K, and N, besides reading our proofs, and verifying references in the British Museum Library, died in December, 1907; Mr. C. B. Winchester, who, as reader, sub-editor, and, after the death of Mr. Brandreth, collater of quotations in the British Museum, was the most valued of our later volunteer coadjutors, died in December, 1908; Mr. Chichester Hart, of Curraghblagh, Portsalon, Donegal, who added to the proofs many quotations from 16th and 17th century dramatists, died in 1908.

The scholars and men of science who have given their assistance in the present volume include nearly all those who have been named in the Prefaces to volumes V and VI, to whom again grateful thanks are recorded. More especially must mention be made of etymological and philological help rendered by Monsieur Paul Meyer, Membre de l'Institut, Paris, and Professor Eduard Sievers, of Leipzig, both Honorary Fellows of the British Academy. Assistance on points of Etymology and Philology has also been received from Professors Napier, Wright, R. Pagan. *Etymol.* The explanation of L. *pāgānus* in the sense 'non-Christian, heathen', as arising out of that of 'villager, rustic', given by Orosius (a Spaniard) *c* 417, has been shown to be chronologically and historically untenable, for this use of the word goes back to Tertullian *c* 202, when paganism was still the public and dominant religion, and even appears, according to Lanciani, in an epitaph of the 2nd cent. The explanation is now found in the L. use of *pāgānus* as = 'civilian, non-militant', opposed to *mīles* 'soldier, one of the army'. The Christians called themselves *milites* 'enrolled soldiers' of Christ, members of his militant church, and applied to non-Christians the term applied by soldiers to all who were 'not enrolled in the army'. Cf. Tertullian *De Corona Militis* xi, 'Apud hunc [Christum] tam miles est paganus fidelis quam paganus est miles infidelis'. See also GIBBON xxi. *note*.

O.

O (ōu), the fifteenth letter of the alphabet in English and other modern languages, and the fourth vowel letter. • O was the fourteenth letter in the ancient Roman alphabet, corresponding in form and value to the ancient Greek O, derived from the sixteenth letter of the Phœnician and ancient Semitic alphabet, ○, ◇, ▽, (Heb. ע), called *ʿain*, i. e. 'eye'. The latter represented a peculiar articulation or consonant, the 'glottal catch' (modern Arabic ع, ʿ), a sound unknown to Greek, in which the symbol was appropriated to the vowel *o* (which the sound of Semitic *ʿain* in conjunction with *a* may have somewhat resembled). In early Greek, O was used for both short and long *o*; subsequently a new symbol Ω, *ω* (*O mégа*, 'great O'), was added to the alphabet to distinguish long open *o*: the original O o (now known as *O micrón*, 'little O') being then restricted to short *o*. From Greek times downward, this letter has regularly represented some variety or varieties of the 'mid-back-round' (or labial) vowel of Bell's Visible Speech scale. On account of its intermediate position, this vowel is (like *e*) liable to considerable variations of quality; and many languages distinguish, as practically different vowels, 'close' (or 'narrow') *o*, and 'open' (or 'wide') *ɔ*; the former tending to approach, and at length to pass into, the still closer sounds u, *u*; the latter tending to fall into the still opener *ɒ*, ɷ.

In OE., short *o* and long *ó* were etymologically and phonetically distinct. Short *o* was originally both close and open. Short close *o* was normally derived from an original *u*, as in OE. *oxa* ox, Skr. *ukshán*, OE. *dohtor*, Gr. *θυγάτηρ*. Indo-European **dhughətḗr*. Short open *o* normally represented an earlier *a* before a nasal, as in OE. *on*, Goth. *ana*, Gr. *ἀνά*. This OE. *o* from *a(n)* is often distinguished for etymological purposes as *ǫ*. OE. long *ó* corresponded generally to Com. Teut. long *ō*, in which were combined Indo-European *ō* and *ā*, as in OE. *bóc* beech, OTeut. **bōkā*, Dor.Gr. *φᾱγός*, L. *fāgus*; OE. *flód*, Goth. *flōdus*, Gr. *πλωτός* swimming. Long *ó* also arose out of a lengthening of short open *ǫ* from *a(n)*, with *n* absorbed, as in *tóð* tooth, OTeut. **tanþ-*, Indo-Eur. **dont-*; *hón*, to hang, OHG. and Goth. *hāhan* from OTeut. **hanh-*, *χαγχ-*. Long *ó* was prob. originally both close and open, but in late OE. it must, from its subsequent history, have been close. In unstressed syllables, *o* was the ordinary OE. representative of the obscure vowel (ə); and in this capacity it often varied with *a*, *e*, *u*.

In the Middle English period the distinction between open and close short *o* is no longer discernible; and the vowel was apparently always open *o* before a consonant in the accented syllable. Of long *ō* ME. had two distinct sounds, open and close. Open *ǭ* was the normal representative (in midland and southern speech) of OE. long *á* (or lengthened *a*), which passed through the sound of (ǭ) to that of [illegible]ing sometimes written in the 13th c. *oa*, but, eventually, simply *o*, or *oo*: thus OE. *mára*, *nán*, *ald* (*eald*), ME. *moare*, *noan* (1257), *more*, *non*, *old*. It often represented long *ō* derived from Fr. or L., or arose out of an earlier short *o* in an open syllable, as OE. *hopa*, ME. *hope*. ME. close *ō* represented OE. *ó*. This *o* must have been a very close sound, for about the end of the ME. or beginning of the mod.Eng. period it passed into the sound of (ū), usually with the spelling *oo*, though sometimes with the simple *o* spelling, as in the words *do*, *to*, *lose*. ME. open *ō* either continued into mod.Eng. as *o* (*bone*, *ore*, *hope*), or was, from 16th c., written *oa* (*oak*, *oat*, *coal*); but in sound it became at length close and quasi-diphthongal (o͡u), except before *r*, where it remains open (o͡ɹ). In the 13th c., *o* began to be written in certain cases for *u*, esp. before *m*, *n*, *u* (= *v*), as in *some*, *son*, *love* (= lǒve), OE. *sum*, *sunu*, *lufu*. This, which has largely survived into mod.E., was merely a *graphic*, not a *phonetic*, change.

The normal sound of short *o* is now (ɒ) low-back-round, varying with mid-back-round-wide (ɔ), and low-back-round-wide (ɒ̜); but it frequently stands for (ɒ), as in *son*, *doth*, or (ʊ), as in *word*; and in unaccented syllables sinks to (ə), as in *nation*. When original short *o* comes before *r* final, or *r* + consonant, as in *or*, *for*, *corn*, *sort*, it is now lengthened into the corresponding long sound *ǫ* (ǭɹ, fǭɹ, kɹ̄n, sp̄ɹt). A still more recent lengthening of *ǫ* often takes place in southern English before certain consonants, as in *cross*, *off*, *moth*, *soft*, and, being as yet only partially recognized, is here represented by *ǭ*.

The normal sound of long *ō*, as in *no*, *toe*, *bone*, is the quasi- or imperfect diphthong (o͡u); but before *r*, as in *here*, *choral*, *story*, the sound is that of the open quasi diphthong (ō͡ə). In London and the south of England, this *o*, esp. when *r* follows in the same syllable, as in *ore*, *worn*, *porter*, is usually identified with the (ǭ) mentioned above as arising from ME. short *o* before *r*. This is not the case, however, in the educated speech of the country as a whole, nor in America, and the sounds are still separated by most orthoepists (see Ellis, *E. E. Pronunciation*, I. 94–95), and in dictionaries generally; they are distinguished in this dictionary, as in *boarder*, *border* (bo͡ɹdəɹ, bɒ̄ɹdəɹ), *mourn*, *morn* (mō͡ən, mɹ̄n).

Hence, in modern English, the normal sounds of *o* are

1.	*ō* in *no*, *bone*	nō͡u, bō͡un.
2.	*ō* ,, *ore*, *glory*	ō͡ɹ, glō͡ɹi.
3.	*ǭ* ,, *or*, *north*	ǭɹ, nɹ̄θ.
3 a.	*ǭ* ,, *soft*, *moth*	sǭft, mǭθ.
4.	*ǫ* ,, *rob*, *got*	ɹǫb, gǫt.

Exceptional sounds, due to special causes, and normally spelt otherwise, are

5.	*ū* (u) in *to* *do*	tu dū.
6.	*ʊ* ,, *son*, *other*	sʊn, ʊ̈ðəɹ.
7.	*ə̄* ,, *word*, *worthy*	wə̄ɹd, wə̄ɹðɪ.

No. 1 is also represented by *oa*, *oe* (final), *ou*, *ow*, *oh*, rarely *eo*; as in *load*, *hoe*, *soul*, *low*, *oh*, *brooch*. No. 2, by *oa*, *ou*, *ow*, rarely *eo*; as in *boar*, *pour*, *Gower*, *door*, *floor*. In *broad*, *oa* has the sound (ǭ). The combination *eo* now normally represents long (ū), long (ū͡ə), short (u), as in *moon*, *moor*, *good*; exceptionally, it has the sound of 'short u' (ʊ), as in *blood*, *flood*, or of 'long o' = Nos. 1 and 2 above.

Oi, *oy*, normally represent a true diphthong (o͡i), as *boil*, *boy*; or an imperfect triphthong, as in *Moir* (moiəɹ).

Ou, *ow*, also normally represent a diphthong (au), as in *out*, *house*, *now*, or an imperfect triphthong, as in *hour* (auəɹ). But *ou* has also various other sounds, as in *soup*, *tour*, *through*, *you*; *soul*, *pour*: *brought*, *cough*, *enough*; in unstressed final syllables it is commonly (ə), as in *favour*, *pious*.

In unaccented syllables, all the sounds of *o* are liable to shortening and obscuration, and tend to sink through *ɛ* or *ʊ*, *ə* or ɷ, to *ĭ*, *ŭ*, *ə̆*, and ə, as in *tobacco* (ə), *to*, *do*, anatomy (ə), dilatory (ə), *sailor* (-ə), *comfort* (ə), *cannot* (ɒ), *parrot* (ə), *notion* (ə), *ration* (ə).

The change of OE. *á* to *ǭ* in ME. was a characteristic of the southern and midland dialects, and thus of Standard English. But the northern dialects retained *á*, the presence of which instead of *ǭ* as in *stane*, *hame*, *mare* = *stone*, *home*, *more*, is one of the most distinctive features of northern English and Scotch. In later times this *a* is often written *ai*, or *oe*, and narrowed to (ɛ, e, ɛ̆ or ĕ, ɪ, ĭ). The change of OE. *ó* to (ū, ŭ), is also proper to Standard English and its related dialects, the sound having become in Scotch one akin to German *ü* and *ö*, or Fr. *eu* and *u*. This, like the English ŭ, ŭ sound, is often written *e*, but more distinctively *u* or *ui*, as in Eng. *good*, Sc. *gud*, *gude*, *guid*. The northern dialects also retain the earlier (ɒ for English au); this is often written in Scotch, as in ME., *ou*, *oue*; but in modern times sometimes *oo*, as in *oor*, *aboot* = *our*, *about*.

The fancy, frequent in authors of the 16th and 17th c., that the shape of the letter O represented the rounded form of the mouth in forming the sound, is seen from the history of the letter to be without foundation in fact.

-o, *suffix* of combining forms of words. On the analogy of Greek combinations (in which the combining stem usually ended in *-o*, as thematic vowel or its representative, or as an addition to a consonant stem), and their adaptations and imitations in Latin, late and mediæval, like *Syrophœnix*, *Gallograeci*, *Gallohispani*, *Anglosaxonicus*, etc., *-o-* has come to be, in modern Latin and in English, the usual connecting vowel in combinations, not merely in ethnic names as *Anglo-Saxon*, *Anglo-Indian*, *Indo-European*, etc., but in scientific terms generally; it is affixed, not only to terms of Greek origin, but also to those derived from Latin (Latin compounds of which would have been formed with the L. connecting or reduced thematic vowel, *-i*), especially when compounds are wanted with a sense that Latin composition, even if possible, would not warrant, but which would be authorized by the principles of Greek composition. Such are *conavo-*, *convexo-*, *cymbo-*, *dolicho-*, *oblongo-*, *ovato-*; *chloro-*, *iodo-*; *cirrho-*, *cumulo-*; *occipito-*, *pneumo-*; *dramatico-*, *economico-*, *historico-*, *politico-*; *joco-*, *serio-*; etc.

1. The primary and etymological function of a combining form in *-o* is to qualify adverbially the adj. to which it is prefixed; as, in Gr., Ἀσπιδοχλωρος 'whitely-green', pale green; mod.L. *ovato-cordatus* 'ovately heart-shaped', cordate with ovate modification; *Anglo-Norman*, Norman as modified in England. Such a comb. is, as it were, the adj. with adverbial qualification, belonging to a sb. with adj. qualification; thus, as to the qualified sb. *steady industry* (adj. + sb.) the corresponding qualified adj. is *steadily industrious* (adv. + adj.), so to *political economy* the corresponding adj. is *politico-economic*. Lord Campbell has used *lego-literary* in the sense 'pertaining to legal literature'.

2. But the use of these forms has been extended, so as to express, as by a kind of abbreviation, almost any manner of relation between the two components. *Anglo-French*, originally 'French of an English sort', 'French as established or spoken in England', is sometimes taken with the converse meaning of 'English settled in France', and commonly with that of 'English in alliance, conjunction, or partnership with French'; so *Franco-German* may even mean 'French in conflict with German'; *Græco-Latin* 'common to Greek and Latin'; *pneumo-gastric*, 'communicating with both lungs and stomach'; *occipito-frontal*, 'reaching from occiput to forehead', or connecting these parts: *occipito-temporo-parietal*, 'including the occipital, temporal, and parietal (lobes of the brain)'; *gramino-carnivorous*, 'feeding on grass as well as flesh'.

3. This *-o* is used also, on Greek analogies, in word-formation. From its regular appearance before certain suffixal elements, as *-cracy*, *-graphy*, *-logy*, *-meter*, it tends to be treated practically as a part of these elements; hence, such expressions as 'the *bureau-ocracy*, *shop-ocracy*, *trade-ocracy*, and other *-ocracies*', 'a professor of all the *-ologies*', 'the last new *-ology*,' 'galvanometers, lactometers, and other *-ometers* without number'.

[OE. *áte*, pl. *átan*, wk. fem., not found in the cognate langs., and of obscure origin. The general Teutonic name is OTeut. **haβron-* and its representatives: see Haver.

Oat differs from other names of cereals, ancient or modern, *as wheat, barley (bigg, beer), rye, rice, maize, millet*, and from its own synonym *haver*, in that, while these are like *dust, sand, snow*, names of *substances* or *things in the mass*, the collective form of which is singular, they having in ordinary language no plural, *oat* is an individual singular, the collective or mass sense of which has to be expressed by the plural, e.g. 'Is the crop rye or oats?', 'wheat, barley, and oats are cereals'. Comparing this with *beans, peasen, potatoes*, and other names of similar grammatical form, it may be inferred that primarily *oat* was not the plant or its produce in the mass, but denoted an individual grain; cf. *groat* with its collective pl. *groats*. This may point to oats being eaten originally in the grains, not, like wheat and barley, in the form of meal or flour. But the scanty early evidence is not sufficient to show this.]

Ob., abbrev. of L. *obiit*, died; used before the date of a person's death.

Ob-, *pref.* The Lat. prep. *ob* 'in the direction of, towards, against, in the way of, in front of, in view of, on account of'. In combination with vbs. and their derivatives, the *b* is assimilated to certain consonants, becoming *oc-* before *c-*, *of-* before *f-*, *op-* before *p-*, and app. *o-* before *m-* (in *omittĕre*). In combination it has the following senses: **a.** In the direction of, towards; facing, in front of; as *obvertĕre* to turn towards, *obaudire* to listen to. **b.** Against, in opposition, as *occurrĕre* to run against, *oppōnĕre* to place against; often merely implying the injurious or objectionable character of an action. **c.** Upon or over; down upon, down; as *obducĕre* to draw upon or over, *obligāre* to bind down, *occidĕre* to fall down. **d.** Completely; sometimes pleonastic, as *obdulcāre* to sweeten (completely), *obdūrāre* to harden greatly; often with a colouring of sense a.

In English use, *ob-* (*oc-*, *of-*, *op-*, *o-*) occurs

1. In combinations already formed in Latin in the senses above-mentioned; rarely in words formed in Eng. itself on Latin elements: e.g. **a.** *obedience*, *obversion*; **b.** *object*, *occur*, *opponent*, *opposite*; **c.** *obluce*, *occident*; **d.** *obdulcorate*, *obdurate.*

2. In mod. scientific Latin, and hence in Eng., in Botany, etc., *ob-* is prefixed to adjs. in the sense 'inversely', or 'in the opposite direction'; e.g. *obcordātus* (Linnæus), *obcordate*, i.e. cordate with the base or broad end presented; *obovate*, ovate or egg-shaped with the wider end presented; *obtriangular*, triangular with the apex downward. See below Obclavate to Obturbinate.

This is not an ancient L. use, where *ob-* was rarely combined with an adj., the chief example being *oblongus* Ovatus, which could hardly be in sense the model for these words. Apparently the prefix represents the *ob-* of the adv. *obversē* Obversely, and is an abridged representation of that word.

† **Obacerate,** *v. Obs. rare.* [f. ppl. stem of L. *obacerāre* to contradict. (Derived according to some Lat. grammarians from *acus*, *acer-* chaff.)] Hence † **Obacera·tion,** a stopping one's mouth.

F. *obéir*:—L. *obēdīre*, orig. *obaudire* to give ear, hearken, obey, f. *ob-* (OB- 1 a) + *audire* to hear. Certain parts of the F. verb (e.g. pr. pple. *obéiss-ant*, 3 pl. pres. *ils obéiss-ent*) have the lengthened stem *obéiss-* (L. type **obēdīsc-ĕre*), whence the Eng. secondary verb OBEISH, OBEIS, as well as OBEISANCE, etc.

F. *obéir*, like L. *obēdīre*, is an intransitive verb, construed with a dative pronoun, or the prep. *à*: *je lui obéis*; *nous obéissons au roi, aux lois*. When the vb. was taken into Eng., the dative and accusative were already levelled under the common object case, or objective; hence, the Eng. construction was either with a simple object, representing the dative, or with the preposition *to*, the vb. being thus syntactically, either trans. or intr. in the same sense. The const. with *to* has now become obsolete, and that with the simple object survived; an intrans. use, e.g. 'to obey is better than sacrifice', is now felt as an absolute use of the transitive. The trans. construction is here taken first, but it is to be remembered that the object was orig. a dative.]

Syst.* I. iii. 170 Aristotle's first mover is not properly the efficient, but only the final and objective cause, of the heavenly motions.

2. *Philos.* Used of the existence or nature of a thing *as an object of consciousness* (as distinguished from an existence or nature termed *subjective*).

The Scholastic Philosophy made the distinction between what belongs to things subjectively (*subjective*), or as they are 'in themselves', and what belongs to them objectively (*objective*), as they are presented to consciousness. In later times the custom of considering the perceiving or thinking consciousness as pre-eminently 'the subject' brought about a different use of these words, which now prevails in philosophical language. According to this, what is considered as belonging to the perceiving or thinking self is called *subjective*, and what is considered as independent of the perceiving or thinking self is called in contrast *objective*. As to this transition of use (which primarily concerns the word *subjective*, and affects *objective* as its antithesis) resulting in what is almost an exchange of sense between the two adjectives, see HAMILTON *Reid's Wks.* 806 note, R. L. NETTLESHIP *Philos. Lect. & Remains* I. 193.

†**a.** Opposed to *subjective* in the older sense = 'in itself': Existing as an object of consciousness as distinct from having any real existence; considered only as presented to the mind (not as it is, or may be, in itself or its own nature). *Obs.*

[*c* 1325 OCCAM *Sent.* I, Dict. 2, qu. 8 E, Universale non est aliquid reale habens esse subiectivum nec in anima nec extra animam, sed tantum habet esse obiectivum in anima et est quoddam fictum habens esse tale in esse obiectivo, quale habet res extra in esse subiectivo.]

1647 JER. TAYLOR *Lib. Proph.* 133 This confession was the objective foundation of faith; and Christ and his Apostles, the subjective. 1659 PEARSON *Creed* ii. (1839) 168 'In the beginning was the Word'; there *was* must signify an actual existence; and if so, why in the next sentence 'the Word was with God' shall the same verb signify an objective being only? 1727-41 CHAMBERS *Cycl., Objective*..is used in the schools in speaking of a thing which exists no otherwise than as an object known. The esse, or existence of such thing is said to be objective. 1744 BERKELEY *Siris* § 292 Natural phænomena are only natural appearances. They are, therefore, such as we see and perceive them: Their real and objective natures are, therefore, the same.

b. Opposed to *subjective* in the modern sense: That is or belongs to what is presented to consciousness, as opposed to the consciousness itself; that is the object of perception or thought, as distinct from the perceiving or thinking subject; hence, that is, or has the character of being, a 'thing' external to the mind; real.

This sense is occasional in writers of the later 17th and early 18th c. (the early examples being more or less transitional); but its current use appears to be derived from Kant, and to appear in Eng. subsequently to 1796, and chiefly after 1817 (see quot. from Coleridge).

1855 FITZJ. STEPHEN in *Camb. The accusative and dative of earlier Eng. (as well as the instrumental, locative, and ablative of prehistoric times) are merged in mod. Occamism (ɒ·kămiz'm). [f. name *Occam* or *Ockham* + -ISM.] The doctrine or system of the English scholastic philosopher, William of Occam, who lived in the first half of the 14th c., called in later times the 'Invincible Doctor'.

Occam was a pupil of Duns Scotus, but rejected and opposed the Realism of his master, forming a new speculative sect who revived the tenets of Nominalism. He maintained

that general ideas have no objective reality out of the mind, but are merely a product of abstraction. His teachings prepared the way for the overthrow of scholasticism.

[*Note.* The climax of this verb in the 17th and most of the 18th c. is notable. Against 194 quots. for 16th c., we have for 17th only 8, out-side the Bible of 1611 (where it occurs 12 times), and for 18th c. only 12, all of its last 33 years. The verb occurs only twice (equivocally) in Shaks., is entirely absent from the Concordances to Milton and Pope, is not used by Gray; and Johnson's quots., exc. 2, are from the Bible of 1611. It was again freely used by Cowper (13 instances in Concordance). This avoidance appears to have been due to its vulgar employment in sense 8; cf. 1597 Shaks. *2 Hen. 1. The vast body of water on the surface of the globe, which surrounds the land; the main or great sea. (Down to *c* 1650, commonly *ocean sea*; before 1400 also *sea ocean, sea of ocean* = L. *mare oceanum* (Cæsar *Bell. Gall.* II. vii, Tacitus *Hist.* IV. xii); OF. *mer oceane, ocianne, occeanne mer*, where *oceane* was adj. fem. qualifying *mer*; and *ocean* may sometimes have been viewed as an adj. *in* Eng.)

In early times, when only the one great mass of land, the Eastern hemisphere, with its islands, was known, the ocean was the Great Outer Sea of boundless extent, everywhere surrounding the land, as opposed to the Mediterranean and other inland seas.

Philos.* III. *Phys. Geog.* 2/1 (U. K. S.) The Ocean is spread over nearly seven-tenths of the globe.

2. One of the main areas or regions into which this body of water is divided geographically.

These divisions are partly natural, through the intervention of portions of land, partly arbitrary for geographical convenience. It is usual to reckon five of them, the *Atlantic, Pacific, Indian, Arctic*, and *Antarctic Oceans*, of which the first two are sometimes subdivided into Northern and Southern. But the Pacific, Indian, and Antarctic really form one great ocean, the 'South Sea'; of which the Atlantic and Arctic again form a smaller prolongation, divided from the larger basin only by an imaginary line drawn between the southern points of Africa and America. The name *ocean* was formerly given to smaller portions of some of these; the North Sea has still the synonym *German Ocean*.

Oct., abbrev. of Octavo, October.

Octa- (ǫ·ktă), a. Gr. *ὀκτα-*, comb. form of *ὀκτώ* eight, with which it varies in some words. Most of the English derivatives of *octa-* appear in their places as main words; the following are of minor importance: **Octachronous** (-ǫ·krŏnəs) *a. Phys.* [Gr. *χρόνος* time] = *octasemic.* **Octacolic** (-kǫ·lik) *a. Prov.* [Colon 2], consisting of eight cola. **Octaphonic** (-fǫ·nik) *a. Mus.* [Gr. *φωνή* voice, sound], composed in eight parts. **Octapodic** (-pǫ·dik) *a. Pros.* [L. *octasemus*, Gr. *ὀκτάσημος*], containing eight more or units of time. **Octastrophic** (-strǫ·fik) *a. Pros.*, consisting of eight strophes or stanzas.

b. In *Chem. octa-*, *oct-* (sometimes *octo-*) indicates the presence of eight atoms or units of an element or radical, as in *octacarbon, octachloride, octammonio-*.

1873 Watts *Fownes' Chem.* (ed. 11) 425 The octammonio-diplatinic compounds consist of double molecules of tetrammonio-platinic compounds having two or more molecules. 1877 Octachloride [see Octad 3].

Odder, compar. of Odd *a.*; obs. form of Other.

O·ddfe·llow, Odd-fellow. [A fanciful appellation: cf. Odd *a.* 9 b.] A member of a society, fraternity, or 'order', organized under this name, with initiatory rites, mystic signs of recognition, and various 'degrees' of dignity and honour, for social and benevolent purposes, especially that of rendering assistance to members in sickness, distress, or other need.

The name 'Odd Fellows' appears to have been originally assumed by local clubs formed in various parts of England during the 18th c. for convivial and social purposes, usually with rites of initiation, passwords, and secret ceremonies, supposed to imitate those of Free masonry. Associations of these clubs were formed from time to time for purposes of mutual recognition; of which that styled the 'Independent Order of Oddfellows, Manchester Unity', formed about 1814, has grown into a vast organization, having local branches or 'lodges' throughout Great Britain and the Colonies, as well as in the United States and some foreign countries. Besides this, there are numerous smaller societies of the same 'order' in Great Britain and the Colonies; a distinct federation also exists in the United States, which, beginning in 1819 in connexion with the Manchester Union, separated from it in 1842, and is now a great and important organization.

1811 *Lex-Bal., Odd Fellows*, a convivial society; the introduction to the most noble grand, arrayed in royal robes, is well worth seeing at the price of becoming a member. 1854 Thoreau *Walden* viii. (1856) 170 Men will..if they can constrain him to belong to their desperate odd-fellow society. 1887 *Pall Mall G.* 2 Sept. 8/2 A great gathering of Oddfellows was held last evening at the Masons' Hall tavern..to welcome the grand master of the Manchester Unity. 1887 *Scotsman* 16 May 6/5 A General Council Meeting of the Scottish Order of Oddfellows' Friendly Society was held on Saturday at the Oddfellows' Hall, Edinburgh.

Hence **O·ddfe·llowship,** the status of an Oddfellow; the principles and organization of the 'Oddfellows'.

1871 *Daily News* 30 June, I am forgetting that some of my readers are, perhaps, unacquainted with the rudiments of Odd-Fellowship. 1883 *Chambers' Encycl.* VII. 36/1 On its institution in Manchester, the main purpose of Oddfellowship was declared by its laws to be, 'to render assistance to every brother who may apply through sickness, distress, or otherwise, if he be well attached to the King and government, and faithful to the Order'.

Odds (ǫdz), *sb.* Also 6–7 **odds,** ods, (6 *Sc.* **oddis, odis,** 7 **odd's,** *pl.* **oddses**). [app. pl. of Odd *a.* taken subst.: cf. *news*. In 16th c. regularly, and in 17th and 18th c. usually, construed as a singular, 'the odds *is* or *was*'; an isolated instance of 'the odds *were*' appears in 1614, but this construction is unusual before the 19th c.

It is somewhat difficult to comprehend how the plural of *odd* came to be taken to express the sense 'difference', and also how a word originally plural should, while still retaining the plural form, have been so constantly viewed and construed as singular. The most likely explanation is that *oddes, oddis* first meant "odd' or 'unequal things' (cf. *news* = 'new things or matters'), a relic of which appears to exist in the phrase 'to make odds even' found in the earliest quotation. But the notion of two odd or unequal things so essentially involves that of the relation between them as easily to pass into that of 'inequality' or 'difference', as it perhaps already did in the phrase in question, and as is fully developed in sense 2. After the sense 'difference' was once established, the plural character of the word might be lost sight of, the more easily that in this sense no singular was in use, nor, from the suggested origin, possible. We may compare the history of *news, means, truce*.]

1. a. In reference to ancient literature (and in some early uses of the word in English): A poem intended or adapted to be sung; e. g. the Odes of Pindar, of Anacreon, of Horace. *Choral Odes*, the songs of the Chorus in a Greek play, etc. **b.** In modern use: A rimed (rarely unrimed) lyric, often in the form of an address; generally dignified or exalted in subject, feeling, and style, but sometimes (in earlier use) simple and familiar (though less so than a *song*).

It rarely extends to 100 lines, and some poems so named are quite short, though prob. the name would not now be given to such. The metre in longer odes is usually irregular (e. g. Dryden *Alexander's Feast*, Wordsworth *Intimations of Immortality*), or consists of stanzas regularly varied (Gray's *Pindaric Odes*); but, in shorter 'odes', sometimes of uniform stanzas (Gray's shorter odes).

1881 LD. SELBORNE in *Encycl. Brit.* XII. 580/1 The system [of Greek hymnody] has a peculiar technical terminology, in which the words 'troparion', 'ode', 'canon'..chiefly require explanation. The *troparion* is the unit of the system, being a strophe or stanza .. divisible into verses or clauses, with regulated cæsuras. ..An *ode* is a song or hymn compounded of several similar *troparia*—usually three, four, or five. ..A system of three or four odes is 'triodion' or 'tetraodion'. A canon is a system of eight (theoretically nine) connected odes, the second being always suppressed.

‖ **Oe** (*ō*·ē). *rare*⁻¹. [For Da. *ø*, *ö* = Norw. *øy*, Icel. *ey*, OE. *ieg*, isle, islet.] A small island.

1817 Scott *Harold* III. v, The bold Baltic's echoing strand Looks o'er each grassy *oe* [*rime* grow].

Oe, another form of Oy *Sc.*, grandson.

Oo, obs. variant of O *sb.*¹, O *adj.* one, O *vb.*

Œ (in the earliest times, and now often, written separately *oe*) was in Early Old English the symbol of the *i*-umlaut of *ó*, *o*, as in *fœt*, *fort*, *soecan*, *æhtan*, *oehtan*, doubtless originally sounded like Ger. *ö*, *e*, in which form it came down into Middle English.

In modern Eng. *æ*, *oe* reproduces the usual L. spelling of Gr. *αι*, which often in med.L., and in Romanic, was treated like simple *ē*. In words that have come into Eng. through med.L. or Fr., or other Romanic langs., Eng. has usually a simple *e*, as in *economy*, F. *économie*, L. *œconomia*, Gr. *οἰκονομία*; *penal*, F. *pénal*, L. *pœnalis*, f. *pœna*, Gr. *ποινή*; *cemetery*, L. *cœmeterium*, Gr. *κοιμητήριον*; but in recent words derived immediately from L. or Gr., *æ*, *oe* is usually retained, esp. (1) in proper names, as *Œdipus*, *Eubœa*, *Phœbe*; (2) in words referring to classical antiquities, as *ærist*, *Pœcile* (in which, however, some represent Gr. *αι* by *ei*, as *eikist*); (3) in scientific and technical terms, as *amœba*, *anothera*, *œstrus*, *dioecious*, *diarrhœa*, *homœopathy*, *pharmacopœia*, *onomatopœic*; but there is a tendency, stronger in America than in Great Britain, to substitute *e* for *æ* in these words when they pass into popular use or become familiar, e. g. *diarrhea*, *esophagus*, *homeoid*. This *æ*, being orig. a diphthong and subsequently a long vowel, is usually pronounced as 'long *e*' (*ī*), rarely as 'short *e*' (*e*); when changed to *e*, it submits to the same usages as ordinary *e* from Gr. and L.

In French, *æ* is an occasional etymological or orthographical substitute for *e* in the diphthongs *ai*, *ain*, as in *æil*, *æuf*, *cæur*; when these words are borrowed in Eng. they retain the Fr. spelling. *æ*, *oe* also occasionally represents Ger. *ö*, *æ*, *oe* (*Goethe*), and the *ö*, *ø* of Scandinavian tongues (*Faroe*).

Œist (*ī*·sist), **œkist** (*ī*·kist). Also **oikist.** [ad. Gr. *οἰκιστής*, agent-n. from *οἰκίζ-ειν* to settle (a colony), f. *οἶκος* house, dwelling.] The founder of an ancient Greek (rarely *transf.* a modern) colony.

A late Greek or Byzantine Scholiast on Oppian, explains it as from οἰσω 'an imaginary pres. to carry' + εφαγον 'I carry' + φαγειν to eat, which, though plausible in sense, is really impossible, σφαγος in all compounds meaning 'eating (something)', 'eater'.]

Of (*ŏv, ŏv, əv*), *prep.* Also (3 *Orm.*) 5-7 **off** (6 **offe**); 3 6 **o,** 6- **o'**: see O *prep.*2 [OE. *of*, weak or unaccented form of the word whose rare strong form was *æf*, originally *af*, corresp. to OFris. *af*, *of*, *ef*, OS. *af*, MLG. *af* prep. and adv. (MDu. *ave*, *af*, *of*, Du. *af* adv. 'off'), OHG. *aba*, *ab*, MHG. *abe*, *ab-* prep. and adv., Ger. *ab* adv. 'off', 'away', ON. *af*, Goth. *af* prep. and adv.:—OTeut. *abă*, unaccented by-form *ab*; corresp. to Skr. *apa* away from, down from, Gr. ἀπό, L. *ab*.

The form whence the OE. was immediately derived was *af* (as in OS., ON., and Goth.). Like other prepositional advbs., this developed two forms, according as it was stressed or stressless; in primitive OE., *æf* and *of*. In historic times the stressed form appeared only in a few nominal compounds (e.g. *æfþunca* displeasure, *æfgeard* absent), while the originally unstressed *of* survived, as inseparable verbal particle or adv. (as in inf. *ofāsēn*, dat. inf. *of to āsēne*, pa. pple. *ofāsēden*, imperative *ās of*, pa.t. *he ādyde of*, in subord. cl. *ʃe he of ādyde*); and, as the adv. in this position always received the stress, this gave rise to a new stressed form. But to the end of the ME. period, and often to 1600 or later, both unstressed and stressed forms were written *of*. About 1400, the spelling *off* appears casually, and usually (but not always) for the stressed form, to which it gradually came in course of the 16th c. to be appropriated (though *of* was sometimes used even in the 17th c.). This emphatic form was restricted to the adv. and those emphatic senses of the prep. which are akin to or derived from the adv. *the off! get off the table! hands off! hands off the money!*; while the original spelling *of* (pronounced *ŏv, ŏv, əv*), further reduced dialectally, colloquially, and in certain connexions, to *o'* (see O *prep.*2), remains for the weak senses of the preposition. Thus *of* and *off* now rank as different words.]

General Signification. The primary sense was *away, away from*, a sense now obsolete, except in so far as it is retained under the spelling Off. All the existing uses of *of* are derivative; many so remote as to retain no trace of the original sense, and so weakened down as to be in themselves the expression of the vaguest and most intangible of relations. The sense-history is exceedingly complicated by reason of the introduction of senses or uses derived from other sources, the mingling of these with the main stream, and the subsequent weakening down, which often renders it difficult to assign a particular modern use to its actual source or sources. From its original sense, *of* was naturally used in the expression of the notions of removal, separation, privation, derivation, origin or source, starting-point, spring of action, cause, agent, instrument, material, and other senses, which involve the notion of taking, coming, arising, or resulting *from*. But, even in OE., this native development was affected by the translational character of the literature, and the employment of *of* to render L. *ab*, *dē*, or *ex*, in constructions where the native idiom would not have used it. Of far greater moment was its employment from the 11th c. as the equivalent of F. *de*, itself of composite origin, since it not merely represented L. *dē* in its various prepositional uses, but had come to be the Common Romanic, and so the French, substitute for the Latin genitive case. Whether *of* might have come independently in Eng. to be a substitute for the genitive is doubtful. In the expression of racial or national origin, we find *of* and the genitive app. interchangeable already in the 9th c. (tr. Bæda's *Eccl. Hist.* III. xix, Wæs þes wer .. of þæm æþelestan cynne Scotta = *de nobilissimo genere Scottorum*; Ibid. III. xxi, Se nyhsta wæs Scyttisces cynnes = *natione Scottus*; se wæs eac Scotta cynnes = *de natione Scottorum*); and this might have extended in time to other uses; but the great intrusion of *of* upon the old domain of the genitive, which speedily extended to the supersession of the OE. genitive after adjectives, verbs, and even substantives, was mainly due to the influence of F. *de*. Beside this—the most far-reaching fact in the sense-history of *of*—the same influence is also manifest in numerous phraseological uses, and esp. in the use of *of* = F. *de*, in the construction of many verbs and adjs. Many of these can be clearly distinguished; but, in other cases, the uses derived from F. *de* have so blended with those derived from OE. *of*, giving rise again to later uses related to both, that it would be difficult, if not impossible, to separate the two streams, with their many ramifications. All that can be done here is to exhibit the main uses of the preposition, and to show generally how

far back each of these is exemplified. It has not been attempted to classify or even mention all the vbs. and adjs. which are or have been construed with *of*; examples occur under the chief senses and uses, but the construction of any individual vb. or adj. must be looked for under that word itself, where also will be seen what other prepositions share or have shared the same function with *of*.

V. Indicating the *agent* or *doer*.

15. Introducing the agent after a passive verb. (The regular word for this is now By (sense 33), which began to come in *c* 1400; but *of* prevailed till *c* 1600, and is still in literary use, as a biblical, poetic, or stylistic archaism, or by association with other constructions, e. g. 'on the part of'. In OE. less used than *from*: cf. Ger. *von* from, of.)

The use of *of* is most frequent after pa. pples. expressing a continued non-physical action (as in *admired, loved, hated, ordained of*), or a condition resulting from a definite action (as in *abandoned, deserted, forgotten, forsaken of*, which approach branch IV). It is also occasional with ppl. adjs. in *un-*, as *unseen of, unowned of*. *Of* often shows an approach to the subjective genitive: cf. 'he was chosen of God to this work' with 'he was the chosen of the electors'. In other senses the agent has passed into the cause, as in *afeard, afraid, frightened, terrified of*; or the source or origin, as in *born of*. Eng. *of* and *by* correspond somewhat to F. *de* and *par*.

16. Indicating the doer of something characterized by an adj., as *it was kind of you* (= a kind act or thing done by you, on your part) *to help him*. Used with an adj. and sb., as *a cruel act, a cunning trick, a foolish fancy, a good thought, a kind deed, an odd thing*; a qualified pa. pple., as *cleverly managed, ill done, well done, well thought*; or an adjective alone, as *good, bad, right, wrong, wise, foolish*; *clever, stupid, rude, silly, unkind*, or any adj. by which conduct can be characterized.

Followed by *to do* (something), he is frequently *that (he) did* (something), which is the logical subject or object of the statement; e. g. I took it kind of him to tell me = I took his telling me as a thing kindly done by him.

24. Between two sbs. in sense-apposition.

a. in the sense 'in the person of; in respect of being, to be, for'. *arch.*

The leading sb. is the former, of the qualification of which the phrase introduced by *of* constitutes a limitation; thus 'he was the greatest traveller of a prince', i. e. the greatest traveller in the person of a prince, or so far as princes are concerned. The sense often merges on that of the partitive genitive, 43.

1470-85 Malory *Arthur* III. xv, He was a ryght good knyght of a yonge man. *Ibid.* xxi. xiii, The trewest louer of a synful man that euer loued woman. 1599 Hakluyt *Voy.* II, The king [is] a very good man of a Moore king. 1697 Dryden *Virgil* (1721) I. Ellis *Catullus* xlix. 1 Greatest speaker of any born a Roman, Marcus Tullius.

b. in the sense 'in the form of'.

The leading sb. is the latter, to which the prec. sb. with *of* stands as a qualification, equivalent to an adj.; thus 'that fool of a man' = that foolish man, that man who deserves to be called 'fool'; 'that beast of a place' = that beastly place.

a 1450 *Knt. de la Tour* (1868) 38 Here is a faire body of a woman. 1599 Nashe *Lenten Stuffe* 57 Some cuill spirit of an heretique it is. 1663 Butler *Hud.* I. iii. 237 'Twas a strange riddle of a lady. 1683 Evelyn *Mem.* 5 Dec., That monster of a man, Lord Howard of Escrick. 1769 Bickerstaffe *Dr. Last in his Chariot* III. ix, O! devil of a helpmate, have I found you out? 1849 Thackeray *Pendennis* lxi, That scamp of a husband of hers. *Mod.* An angel of a woman. A gem of a poem. A duck of a hat (*colloq.*).

Brooke *Fool of Qual.* (1809) II. 153 We shall have a heavy loss of our friend Ned. 1820 Byron *Wks.* IV. 347 A precious representative I must have had of him.

b. Of things, as in 'to have a bad time of it'.

Of it appears orig. to mean 'consisting of' or 'comprised in' the fact or circumstance referred to.

1643 Trapp *Comm. Gen.* xxxii. 31 Our Captain had a bloody victory of it. 1670 R. Montagu in *Buccleuch MSS.* (Hist. MSS. Comm.) I. 485 Conte de Graminont has had a troublesome journey of it. 1741 Richardson *Pamela* II. 32 What a fine Time a Person..would have of it. 1872 Ruskin *Fors Clav.* xv. 3 Living quite as hard a life of it. *Mod.* You will have a bad quarter of an hour of it, I assure you.

VIII. Indicating the *subject-matter of thought, feeling, or action*, i. e. that about which it is exercised.

26. In sense: Concerning, about, with regard to, in reference to. After verbs, substantives, and adjectives.

a. After intransitive verbs; esp. those of learning, knowing, thinking, and expressing thought, as *hear, read, know, think, dream, judge, tell, relate, write,* and the like. In subject-headings, titles of chapters, etc., often without a vb. as 'Of Snakes in Iceland'; here, *of* is now often omitted. To these may be added such as *joy, complain, doubt, despair,* etc., which are closely akin to IX.

Rare in OE. (which commonly used *be*, or with some vbs. the genitive); but *of* occurs after *secgan* to tell, and in late OE. after *sprecan* to speak.

IX. Representing an original *genitive dependent on a verb or adjective.*

Many vbs. and adjs. in OE. were followed by a genitive case as an object or complement. In Latin, also, many adjs. and some vbs. were construed with a genitive, represented in French by *de*. These are represented in Middle and Mod. English by construction with *of*. Such of these as now attach themselves closely in sense to one or other of the preceding branches, have been there mentioned; but there remain many verbs and adjs. after which *of* has hardly more than a constructional force, or in which it does not clearly fall under any of those branches. Many of these come close in sense to branch VIII, while others, esp. the adjs., often approach or coincide with the objective genitive in branch X. It is convenient therefore to consider them here.

29. In the construction of verbs.

a. After intrans. vbs. Many of these in OE. took the genitive, and are found with *of* in Middle and Early Modern English, but this is now rare, except where *of* falls in sense under one of the branches already treated; instances are *to reck, repent, rue, beware* (orig. *be ware*) *of*. Verbs of sense, e. g. *feel, smell, taste, touch* (still with *of* in dial. or vulgar use), verbs of asking, as *ask, beseech, demand, desire, entreat,* and others, e. g. *distinguish, esteem, forget, like, seize,* formerly construed with *of*, now take a simple object; some, as *accept, admit, allow, approve, conceive, recollect, remember,* still have both constructions; with others, as *hope, look, thirst, wait,* etc., *of* has been displaced by *for* or some other preposition.

30. In the construction of adjectives. Besides those mentioned under the preceding divisions, many adjs. are construed with *of* and an object; the following are representatives of some of the chief groups: *fruitful, prolific, ominous, redolent*; *liberal, lavish, prodigal, scant, short, sparing*; *capable, incapable, susceptible*; *worthy, unworthy, guilty, guiltless, innocent*; *certain, uncertain, confident, diffident, doubtful, sure*; *aware, conscious, unconscious, ignorant, sensible, insensible*; *careful, careless, forgetful, heedful, heedless, hopeful, hopeless, mindful, unmindful, reckless, regardless, thoughtless, neglectful, negligent, observant, watchful*; *ambitious, desirous, eager, cautious, enamoured, curious, fond, greedy, jealous, studious, suspicious*; *disdainful, indulgent, patient, impatient*; those in *-ive*, as *apprehensive, communicative, descriptive, destructive, expressive, indicative, productive*; and some in *-ic*, as *characteristic, symbolic*.

Many of these involve a substantive, which may be considered as the subject of the genitive relation; e.g. *hopeful of* having hope of, *envious of* having envy of, etc.; others are verbal derivatives, and are closely akin to the objective-genitive group X, e.g. *expressive of* = that expresses.

The *of*-clause is grammatically an adverbial qualification of the adj., for which an adv. may often be substituted, e.g. *weak of mind*, 'mentally weak'. Taken together, the adj. + the *of*-clause = a compound (parasynthetic) adj., e.g. *light of foot*, 'light-footed', *strong of limb*, 'strong-limbed'. It is further equivalent to the *of*-clause of quality in XII, e.g. 'a man weak of mind' = 'a man of weak mind'; the latter being the ordinary prose form.

44. Followed by a possessive case or an absolute possessive pronoun.

Originally partitive, but subseq. used instead of the simple possessive (of the possessor or author) where this would be awkward or ambiguous, or as equivalent to an appositive phrase; e.g. *this son of mine* = this my son; *a dog of John's* = a dog which is John's, a dog belonging to John. (All the early examples, and many of the later, are capable of explanation as partitive.)

XIV. In the sense *Belonging* or *pertaining to*; expressing possession and its converse: 'the owner of the house', 'the house of the owner'.

Formerly expressed by the genitive, and still to some extent by the possessive case (with suppression of order). The use of *of* began in OE. with senses 47, 48, expressing origin. After the Norman Conquest the example of the French *de*, which had taken the place of the L. genitive, caused the gradual extension of *of* to all uses in which OE. had the genitive; the purely possessive sense was the last to be so affected, and it is that in which the genitive or 'possessive' case is still chiefly used. Thus, we say *the King's English*, in preference to *the English of the King*; but *the King of England* in preference to *England's King*, which is not natural or ordinary prose English.

47. Belonging to a place, as a native or resident.

This occurs in OE. with the sense of origin = 'springing or coming from, belonging by origin to' (properly with þ in the 11th c. this passed into the sense 'belonging to as inhabitants or occupants', 'living in', and so of things 'situated in or at').

XVI. In *Locative* and other obsolete uses.

Many former uses of *of* are difficult to class. Some of these arose from employing it as a literal rendering of French *de* or of L. *ab, ex, de*), in phrases where English idiom would have required some other preposition; others arose from a confusion with *on*, or erroneous expansion of *a, a = on* (A *prep.*[1], O *prep.*[1]), or of Sc. *a'* for *i' = in*. Others were app. due to confusion of constructions. Without endeavouring to distinguish these, examples are here given in various senses.

63. *Of* forms the last element of many prepositional phrases: e.g. *because of*; *by means of, by reason of*; *for fear of, for the sake of, for want of*; *in behalf of, in case of, in comparison of, in consequence of, in face of, in lieu of, in regard* or *respect of, in spite of, instead of*; *on account of, on behalf of, on condition of, on the point of*; etc. See the sbs.

Of-, *prefix*[1], the prepositional advb. OF; OFF, in comb., corresp. to OS. *af-*, ON. *af-*, Goth. *af-*, OHG. *ab-*; L. *ab-*, Gr. ἀπο-, Skt. *apa-*, forming compounds of different ages.

1. In vbs. and their derivatives of Germanic or OE. age, retained in ME., but now obs. In these the original literal sense 'away, off' seldom survived even in OE.; the compound verb, formed by the close union of particle and verb, having usually undergone a modification, extension, or transference of meaning, in which the original sense of the elements, esp. of the particle, was obscured or lost. Examples: *ofhold* to hold from, withhold, *ofsake* to put away a charge, deny, *ofthink* to displease, grieve, *ofask* to ask for, get by asking, *ofclepe* to call for, *ofsend* to send for. *Of-* frequently added to the verbal notion that of 'to do away with, finish off, destroy, kill', as in *ofslay, ofsting, oftread*; of 'to injure, hurt', as in *oflie, ofsel, ofsit*; of 'to outdo or overcome', as in *ofride, ofrun*. Closely allied to this is the sense, in participial adjectives, of 'overcome or exhausted with the action expressed by the vb.', as in *ofalen, offought, ofhungered, ofthirst*. Words of this class which came down into ME. will be found in their alphabetical places.

In ME. *of-* before a cons. was frequently reduced to *o-*, *a-*, and thus identified in form with several other prefixes of different origin: see A- *prefix.*, and OF- *prefix*[1] and cf. ADOWN, OF-HUNGERED, A-HUNGERED, OFTHIRST, ATHIRST, etc.

2. In later combinations of OE. and ME. age, the sense of the two elements remains manifest, the particle being usually = 'off'; the union is much looser, the particle being in vbs. mostly separable, with its position depending on the syntax. It was only in pples., verbal adjs., and sbs., that the combination became more or less permanent. In the 16th c., *of-* in this connexion passed imperceptibly into *off-*, which is always the form in later combinations. Hence these naturally attach themselves to OFF- *pref.*, under which see the ME. examples.

Of-, *prefix*[2], in ME. appears sometimes to represent an earlier *a-*. OE. *of-* being often phonetically reduced to *a-*, there arose a confusion between the prefixes, so that original *a-* was sometimes expanded to *of-*. See OFFEAR, OFFRIGHT, OFGRAME, OFGRISEN, OFKEN, OFSCAPE, OFWAKE (in some of which, however, *of-* may be original).

Of-, *prefix*[3], in ME. sometimes varies with *ofer*, OVER, from which it may be shortened. Cf. OFGO, OFHEAR, OFTAKE. But this cannot always be distinguished from OF- *prep.*[1] in the sense 'outdo or overcome' as in *ofride, ofrun*.

Off (ɒf), *adv., prep., adj.,* and *sb.*[1] Forms: 1–7 of, (5 ofe, 6 offe), 5– **off** (*Sc. dial.* aff). [Originally the same word as Of, as explained under that word; *off* being at first a variant spelling, which was gradually appropriated to the emphatic form, i. e. to the adverb and the prepositional senses closely related to it, while *of* was retained in the transferred and weakened senses, in which the prep. is usually stressless and sinks to (ɔv). *Off* appears casually from *c* 1400, but *of* and *off* were not completely differentiated till after 1600: cf. A. 3, B. 1.]

In this article are included all examples of the adv., whether under (α) the earlier spelling *of,* or (β) the later *off*; but, of the prep., only those uses for which *off* is now the recognized form; for others see Of.

Off-, *prefix.* The adv. *off* occurs in combination with verbs, ppl. adjs., vbl. sbs., and other sbs. In earlier times, it was written *of-*, as explained under Of- *pref.* 2; but such of the ME. compounds as survived into modern Eng. were then written *off-*, which is the only form found in recent compounds. In verbs, generally, the combination is very loose (see 1 below); in participles used as adjs. the union is closer, and in vbl. and other sbs. it becomes permanent, though combinations of this kind can be formed at pleasure whenever the sense requires. In a few cases, the combination is so specialized in sense, or otherwise important, as to require treatment as a main word. In verbs, the stress is now usually upon the root; in the other classes (2–4) on *off-*.

1. With verbs, *off-* (ME. *of-*) enters into quasi-combination, chiefly as a separable particle, like Ger. *ab-* in *ab-reisen*, *ab-schreiben*, etc., in which the particle stands before the vb. only in certain syntactical conditions. In ME. *of* was frequently put before the vb. in the infinitive, as in *of glide*, *of hew*, and in this position (though usually written as a separate word in the MSS.) is often hyphened by modern editors (*of-glide*, *of-hew*); modern prose usage prefers the order *glide off*, *hew off*; but in the ppples. the adv. is still sometimes put first, and is then sometimes hyphened to the vb. (as is regularly done in 2). ME. examples are the obsolete *of-cwell*, *of-quell* (to kill off), *of-*, *off-drive*, *of-glide*, *of-hew*, *of-hurl*, *of-race* (to pluck or tear off), *of-rive*, *of-shear*, *of-shred*, *of-smite*, *of-swipe* (to cut off with a sweep of the sword),

of-tear, of-turn, of-twitch, of-weve (to twist off), *of-wip* (to whip off). Later examples are *off-chop, -off, off-shake, off-stand, off-trench*, etc., but these are exemplified chiefly in the pa. pple., where the hyphen may be regarded as simply syntactical as in 2. See also OFF-DRIVE, OFF-LOAD, etc.

Officinal (ɒfisinăl, ɒfiˈsainăl), *a.* and *sb.* [ad. med.L. *officināl-is*, f. *officina*: see prec.

Officina, in ancient L. 'a workshop, manufactory, or laboratory', was applied in med.L. also to a store-room of a monastery in which provisions, medicines, or necessaries of any kind were kept for use; in later use it seems to have been extended, like 'shop', from a workshop to a sale-shop. In monastic L. *officinālis domus*, *officinale*, occurs also in the same sense as *officina*. As used of herbs and drugs, it is not quite clear whether *officinalis* meant 'of the sort used in the pharmaceutical laboratory', or 'of the sort kept in the shops of herbalists and druggists', the resultant sense, 'used or recognized in pharmacy or medicine', being the same in either case.]

A. *adj.* **1.** Of a herb, plant, drug, etc.: Used in medicine or the arts. Of a medical preparation: Kept in readiness in apothecaries' shops; made according to the recipe prescribed in the pharmacopœia. Of a scientific name: Adopted by the pharmacopœia.

As applied to plants, it answers to the Linnæan specific name *officinālis*, *-ale*, given to that species of a genus which has been used in medicine, and known 'in the shops' by the generic name; e. g. *Anchusa*, *Borago*, *Pulmonaria officinalis*, *Lithospermum*, *Symphytum officinale*, *Aurichasa* of the shops or herbalists, Common Alkanet, etc.

In the transferred sense, 'recognized by the pharmacopœia', *officinal* has been recently superseded by Official (5 b).

The use of *ogee* as the name of a moulding and curve is exclusively English, and the history of this is not clear; but it seems possible that the 'ogee moulding' was so called by workmen as being the usual moulding employed in ogives or groin-ribs, in which it is a development of the roll-and fillet (see Paley, *Gothic Mouldings* (ed. 1865), 33, 35, 48, 52).]

2. *Arch.* and *Joinery.* A moulding consisting of a continuous double curve, convex above and concave below; a cyma reversa.

In cross-section, its outline is a sort of S shape when the moulding (with reference to the solid on which it is worked) is towards the observer's left hand, and like this reversed when towards his right. If the S outline is towards his right, or the reversed shape towards his left, the moulding is termed a back-ogee, a cyma, or a cyma recta. An inverted back-ogee (frequently used as a base-moulding to a wall or plinth), and an inverted ogee, are such mouldings respectively turned upside down. The double-curved fall of a pian is a familiar example of the inverted ogee. The term ogee is sometimes applied to all the above curves indiscriminately.

1. An alphabet of twenty characters used by the ancient British and Irish; the system of writing, or an inscription written, in such characters; also one of the characters themselves.

The characters consist each of a thin line or stroke, or a group of from two to five such parallel strokes, arranged along either side of, or drawn across, a continuous medial or guiding line. Thus *b, l, ṅo (r, f), s, n*, are represented by 1, 2, 3, 4, 5 strokes under the line; *h (h), d, t, c, q* by the same above the line; *m, g, y, z, r*, by long strokes crossing obliquely, thus /; *a, o, u, e, i* by short strokes crossing at right angles. In inscriptions, the edge of a squared stone usually serves as the continuous base line.

The OSp. repr. of *Orcus* were *huerco* (Percivall), *huergo*, *uergo* (Diez); Mod.Sp. *ogro* 'ogre' is from Fr. Ohm[2] (ōum). *Electr.* [From the name of the German physicist Georg Simon Ohm (1787-1854), who determined mathematically the law of the flow of electricity (*Ohm's law*).] The unit of electrical resistance: see quots.

'It was in this country that .. the term "ohmad" or "ohm", suggested by Sir Charles Bright and Mr. Latimer Clark at the meeting of the British Association in Manchester in 1861, first came into use as the name of a decimal multiple of the absolute unit of resistance convenient for practical purposes. At the Congress of Electricians in Paris in 1881, the Ohm was unanimously adopted as an international standard'. *Nature* 14 Feb. 1889. 365/2

1870 F. L. Pope *Electr. Tel.* iii. (1872) 25 The Ohm..is equivalent to about ⅛ of a mile of galvanized No. 9 iron wire. 1876 Preece & Sivewright *Telegraphy* 5 It is convenient..to use a symbol to represent the ohm as we use ° to represent degrees, and ' minutes. The symbol used by us is Ω, the Greek *omega*. Thus we say that the resistance of a wire between London and Birmingham is 150Ω. 1892 *Gloss. Electr. Terms* in *Lightning* 3 Mar. Suppl.. The Ohm is the resistance of a column of mercury of a constant section of one square millimetre and of a length of 106·3 centimetres, at the temperature of melting ice.

Hence **Oh·mad** = Ohm; **Ohm-a·mmeter,** an instrument for measuring electrical current and resistance, a combination of an ammeter and an ohmmeter; **Oh·mic** *a.*, pertaining to or measured by the ohm; **Oh·mmeter,** an instrument for measuring electrical resistance in ohms.

-oid (oid, ȯid), *suffix*, ad. mod.L. *-oides*, Gr. *-ειδής*, i. e. *-ο-* of prec. element or connective + *-ειδής* 'having the form or likeness of', 'like', f. *εἶδος* form; cf. L. *-i-formis*: see -form. (A parallel Gr. formative was *-ώδης*: see -ode.) Examples: *αἱματοειδής* (*αἱματώδης*) 'like blood, of the appearance of blood, hæmatoid'; *ἀνθρωποειδής* 'of human form, manlike, anthropoid'. In other mod. langs., as in Gr. and L., the *o* and *i* make distinct syllables (L. *anthrōpoīdes*, F. *anthropoïde*, Ger. *anthropoid*); in Eng. also, some pronounce (ænþrŏ·pȯid), but the prevalent pronunciation of the suffix (and in many words, as *alkaloid, asteroid*, the only one) is with the diphthong (oi) as in *void.*

Extensively used in scientific terms, taken from Greek prototypes, or formed on Gr. (rarely L.) words. These are primarily adjs. with the sense 'having the form or nature of, resembling, allied to'; but also (as sometimes in Gr.) sbs., in the sense of 'something having the form or appearance of, something related or allied in structure, but not identical'. The sbs. are esp. numerous in Mathematics, where, in imitation of *rhomboid* (Gr. *ῥομβοειδής* approaching a lozenge (*ῥόμβος*) in shape, a rhomboid) and *trapezoid* (Gr. *τραπεζοειδής* having somewhat of the form of a table (*τράπεζα*)), the suffix has been used to form the names of many geometrical figures.

Examples:—*(adj.)* Anat. *adenoid, arachnoid, arytenoid, coracoid, hyoid, sigmoid, thyroid*; Zool. *anthropoid, cancroid, crinoid, echinoid, hydroid, ichthyoid, medusoid, simioid*; Bot. *ovoid, scorpioid.*

(sbs.) Math. *cardioid, cycloid, ellipsoid, hyperboloid, rhomboid, spheroid, trapezoid*; Astron. *asteroid, planetoid*; Chem. *albuminoid, alkaloid, amyloid, colloid, crystalloid, metalloid, selenoid*; Bot. *aroid, fucoid, rhizoid*; Zool. *zooid*; Min. *amygdaloid.*

The mod.L. *-oida, -oidea, -oidæ, -oidei, -oideus* (Eng. *-oideous*), are derivatives of *-oīdes, -oid.*

-oidal. When the form in *-oid* is a sb., an adj. is formed in *-oidal* (see -al); as *conchoidal, cycloidal, rhomboidal, trapezoidal*; so *alkaloidal, asteroidal, fucoidal*, etc.

Oidematous, variant of Œdematous.

‖ **Oidium** (ōi,i·dĭŭm). *Bot.* [mod.L., f. Gr. *ᾠόν* egg + *-ίδιον* dim. suffix.] A former genus of parasitic fungi, comprising species now regarded as the conidial stage of various fungi of the family *Erysipheæ*; they cause various diseases of plants, and of the human subject. *spec.* The species *Oidium Tuckeri* (*Erysiphe Tuckeri*, or the disease of the vine produced by this; grape-mildew.

b. with *an* and *pl.*, indicating a particular kind or different kinds.

The oils constitute a very large group of natural substances, of animal, vegetable, or mineral origin. They are divided into three classes: (1) *Fatty* or *fixed oils* (see Fatty 6, Fixed 4 c), of animal or vegetable origin, which (in common with *fats*) are chemically triglycerides of fatty acids, and produce a permanent greasy stain on paper, etc.; these are subdivided into *drying oils*, which by exposure to air absorb oxygen and thicken into varnishes, and *non-drying oils*, which by exposure ferment and become rancid; they are used as lubricants, as illuminants, in making soap, and for various other purposes. (2) *Essential* or *volatile oils* (see Essential *a.* 5 b), chiefly of vegetable (sometimes of animal) origin, which are acrid and limpid, and form the characteristic odoriferous principles of plants, etc.; chemically, they are hydrocarbons, or mixtures of hydrocarbons with resins, etc.; they are extensively used in medicine and perfumery, and in some cases in the arts. (3) *Mineral oils*, which are chemically mixtures of hydrocarbons, and are used chiefly as illuminants.

Drying oils contain glycerides of linoleic and similar unsaturated acids.

-ol, *suffix*, used to form chemical terms.

1. The termination of *alcoh-ol*, used to form the names of substances which are alcohols in the wider sense (ALCOHOL 5), or compounds analogous to alcohol; e. g. *carbinol* (methyl alcohol), *methol, pseudol, glycol* (2-atomic alc.), *glycerol* (3-atomic alc.), *phenol* (phenyl or benzene alc.), *naphthol* (naphthyl alcohol), etc. In some cases this systematic nomenclature has not displaced the name which the substance had previously received, e. g. *glycerol* is more commonly known as *glycerin* (or, commercially, *glycerine*).

2. From *phenol*, the ending has been transferred to bodies belonging to the group of *phenols* (which are alcohols), as *anthranol, anthrol, cresol, cymenol, eugenol, thymol*, and to some other phenol derivatives, as *anethol, creosol, guaiacol, phenetol, phlorol, pyrogallol, veratrol, xylenol.*

3. In some words *-ol* is a deriv. of L. *oleum* oil; in which case it is more systematically written *-ole*; e. g. *furfurol, indol, oxindol, pyrrol, terpinol.*

4. Of (any specified) age or length of existence: e.g. *How old? ten days old.* When used *attrib.* with a prec. numeral and sb. these are usually hyphened to *old* (*year* being used instead of *years*), as in *a six-months-old child, a two-year-old sheep*, etc. These attrib. forms are also used *absol.* as sbs.: e.g. *a flock of two-year-olds.*

The numeral and sb. were in OE. in genitive as an advb. determination of *eald*, e.g. *þritiges ȝeara ald* (cf. Ger. *drei tage alt, eins tags alt*, F. *âgé de trente ans*); but by the 12th c. the genitive inflexion was dropped; cf. quots. 1110–1200. See also b.

b. The expression '*x* years old' may be preceded by a prep., as if it were a sb. phrase = 'the age of *x* years': e.g. 'a child of ten years old', 'from two years old and under', 'at, under, or over six months old'.

This construction appears first with *of*, which may possibly represent the OE. (and Com. Teut.) genitive phr., or the corresponding Fr. phr. with *de* (see note to 4), so that 'a child of *x* years old' might be orig. = 'a child old (in respect) of *x* years'. But there is a chronological gap between the two constructions, the earliest examples of the later being in *Cursor M.* In one instance, the oldest text has 'o tua yeir eild', i.e. 'of two years' *age*', in which the later MSS. substitute *old* for *eild*. But in another instance, the rending 'of thre ȝer alde' is evidently original. Whether this implies a confusion between *old, eld* adj. and *eld* sb., as app. in the Chaucer quot. which follows, or the existence of two forms derived from OE. *þreora ȝeara eald*, viz. 'three year old', and 'of three year old', is not clear; but what is evident is that '*x* year(s) old' soon came to be taken in the lump as a sb. phr. which might be preceded by any prep., since we find *c* 1420 'from iij yere olde til x', and in the next cent. 'at nine months old' = 'at the age of nine months'.

A similar usage is found with *high, long, broad, deep*, etc. (which also in OE. were preceded by a genitive or accus. phr. of dimension but there the const. with *of* appears to be later, and that with other preps less usual: see OF 39 b.

Oleomargarine (ōulĭomārgărēn, -in). [f. Oleo- b + Margarine. Often mispronounced (-mārdʒərēn), as if spelt *-margerine*.]

A fatty substance obtained by extracting the liquid portion from clarified beef fat by pressure, and allowing it to solidify; with the addition of butyrin, or more or less admixture of butter, milk, etc. and sometimes of refined lard, it forms a substitute for natural butter, formerly sold as *butterine*, but now legally called in Great Britain (also in France, Germany, Denmark, etc.) *margarine*.

¶ In U.S. *oleomargarine*, popularly *o'leo*, is the recognized name of the commercial product, the expressed fat being distinguished as *oleo-oil*.

The name *oléo-margarine* was applied as early as 1854 by the French chemist Berthelot (*Ann. Chim. Phys.* XLI. 242 footnote) to a solid substance obtained (1848) by Pelouze and Boudet (*Comptes Rendus* VII. 66.) from olive oil, which of the

of Chevreul and Berthelot. (See Margarine.) According to the view then held, *oléine*, '*margarine*', and *stéarine*, were regarded as the essential constituents of animal fat. As butter, or the fat of milk, consists according to Chevreul mainly of *oléine* and '*margarine*', with a small amount of butyrin and allied principles, M. Mège-Mouriès in 1869–71 experimented on its artificial production by the extraction of the oléine and 'margarine' from animal fat, with subsequent processes for the addition of butyrin, etc. Hence the name *oléo-margarine* for the supposed combination of oléine and 'margarine' thus extracted. As further research has shown that neither the '*margarine*' of Chevreul, nor the *oléo margarine* of Berthelot are definite chemical substances, these names are no longer in chemical use, and 'oleo-margarine' has only a manufacturing or commercial use for the fatty substance described above, or (as in U.S.) for the artificial butter (Margarine) made from it.

Oliver 2 (*ɒ*livəɹ). [Origin uncertain.] A tilt-hammer having the arm or handle attached to an axle, worked with the foot by a treadle which brings the hammer down, and with a spring which raises it; used esp. in the shaping of nails, bolts, and the like.

Such a contrivance is described in 1686 by Plot *Oxfordsh.* 390 ‘A large sledg..set in an axis of wood, from whence goes a rodd of iron fastned to a pallet that reaches out a little beyond the anvil, which being drawn by the foot of the smith..is returned again by three springs of holly that clasp the axis the contrary way’. This mention of ‘springs of holly’, together with the variant *holliper* in quot. 1883, has suggested that the origin may be found in *holly*, although the established spelling (which evidently goes back to times anterior to living memory) points to the proper name *Oliver*.

On (*o*n, *unstr.* ən), *prep.* Also 1-5 **an**, 2-5 **b**, **a** (see An *prep.*, A *prep.*¹, O *prep.*¹); (3 æn, Orm. ǫnn, 4-5 oon, 5 onne, 5-6 one, un, 6 onn). [OE. *an*, *on* = OFris. *an*, OS. and ODu. *ana*, *an* (MDu. *ane*, *an*, *aen*, Du. *aan* (dial. *an*), MLG. *an*, LG. *ân*, *an*), OHG. *ana*, *an* (MHG. *ane*, *an*, Ger. *an*), ON. *á* (Norw., ODa. *aa*, OSw. *å*), Goth. *ana* :—OTeut. **ana* prep. adv. = Gk. *ἀνά* on, upon, up, Zend *ana* upon, Oscan and Umbrian *an*. The original WGer. *an* was sometimes retained in OE. (see An *prep.*), but the regular stressless form was *on*. Before 1200, unstressed *on* before a cons. was worn down to *o* and *a*, e.g. *o bisse wise* on this wise, *o live*, *a live* in life, and in this form often coalesced with the following word as *olive*, *alive* ; when the following word began with a vowel, the enclitic form was *an*, as *an-edge*, *an-ende*, *an-hand*, *an-high*. See A *prep.*¹, An *prep.*, O *prep.*¹ This form *a* (rarely *an*) survives only when its connexion with *on* is no longer felt, and usually in combination, as *ashore*, or in special constructions as *set a going*. The regular prep. and adv. is *on*. But in 16-18th c. the prep. was often colloquially, and in the dramatists, reduced to *o'*, as in *o' my life* (Shaks.), *o' my conscience* (Sheridan), a form now prevalent in north Eng. dialects: see *Eng. Dial. Dict.*]

General Sense :—The preposition expressing primarily the relation of contact with or proximity to the surface of anything, and so that of being supported or upheld by it ; also, from the earliest times expressing motion to or towards such a position ; these two senses being (as in the preposition In) distinguished by the *case* of the word affected, the former taking, in OE., the *dative* (rarely the instrumental) for earlier locative, the latter the *accusative* or case of motion towards. But the OE. point of view often differed from the modern, so that the accusative was not seldom used where we should expect the dative, and *vice versa*. (See Wülfing *Syntax Alfreds der Grossen* II. § 784, 801, 821). In ME., the distinction of case disappeared, but *on* continued in both uses, the sense being generally indicated by the accompanying verb (e.g. to *lie* on, to *lay* on), though not infrequently with ambiguity, to remedy which the sense of motion began in the 16th c. to be indicated in case of need by the collocation *on to*, now sometimes written *onto*, after the analogy of *into*.

From the earliest times in the Teutonic langs. this prep. has been used in reference not merely to the upper surface or top of a thing, but to the front or any surface (this being the mod.Ger. and Du. use of *an*, *aan*, e.g. *an der thür* at the door, *an die thür* to the door) ; this was also the use in OE. But here *on* received a notable extension of sense, by being used to include also the notion of 'in', almost to the elimination of the prep. *in* from W. Sax. and the dialects influenced by it. (Cf. In *prep.*) So in Early southern ME., *on* still included the sphere of both 'on' and 'in' (sense 5 ; but *in* was gradually restored ; not, however, without the survival of many traces of the former prevalence of *on* ; thence also a difficulty, in some of the transferred senses, in determining whether the starting point was 'on' or 'in'. Eventually, not only was this extension in the direction of 'in' given up, but the language has shown a growing tendency to restrict *on* to the upper or at least the supporting surface, = F. *sur*, so as to correspond in use rather to *auf* than *an* in German; this comes out strongly also in the transf. and fig. senses in which *on* indicates the basis or foundation of action, feeling, etc. In OE., when the upper surface was specially in view, *ofer* was sometimes used ; but the notion was usually expressed by the combination *uppan*, *uppon* (= *up* + *on* : cf. ON. *upp á*). When, in course of time, *on* itself came to be more associated with the upper surface, the distinction between *on* and *upon* gradually faded away, and *upon* may now be used instead of *on*, in positions into which no notion of *up* enters (see Upon). These changes in the sense-territory covered at different times by *on* make the historical and logical order of the senses difficult ; and the following arrangement is in many respects provisional. Even the primary division into senses implying position and those implying motion or direction is difficult to carry out in the figurative uses, in some of which the point of view has gradually changed since they first arose, so that what was originally felt to express a direction of the mind towards something is now felt as a static attitude or mental state.

* Of local position outside of, but close to or near, any surface. Primarily of things physical, but also of non-physical things treated as having extension.
